Taking Custom Measurements for Knee Pads

First, determine the circumference completely around your **thigh**. Take this measurement at a point **4" above** the **top** of your **kneecap**.

Then, determine the circumference around your **calf**. Take this measurement at a point **4" below** the **bottom** of your **kneecap**.

... or for Elbow Pads

First, determine the circumference completely around your **bicep**. Take this measurement at a point **4" above** the **tip** of your **elbow**.

Then, determine the circumference around your **forearm**. Take this measurement at a point **4" below** the **tip** of your **elbow**.
